

## *Comprehensive Post Hospitalization Care Package*

If your elderly parent or loved one has recently hospitalized and is being discharged to home; Harvest In-Home Care provides elder home care tailored to meet the needs of the individual clients that are recovering from a recent hospitalization.

After being discharged from the hospital, 35% of seniors are readmitted after only 90 days. For seniors, hospital readmission is usually a result of not following doctor recommendations, medication errors or an environment that cannot support the health care needs that the elder requires.

Our post-hospital home care can be present at the time of the clients discharge from the hospital to help ensure a smooth transition. Whether your loved one is living in an independent/assisted senior community, or their own home; our caregivers can provide care assistance to meet their care needs.

Our caregivers are professionally trained and experienced in providing post-hospital care for seniors. We assist our client's ability to avoid readmission and have a faster recovery time by implementing the following:

- Partner with their chosen Home Health Care agency
- Provide medication reminders as ordered by their MD
- Provide transportation to all follow up appointments
- Prepare meals by adhering to dietary needs and or restrictions
- Provide support, encouragement and companionship as the client is recuperating and rehabilitating in the comfort of their home.
- Provide 5 days of service; 8 hours per day to accommodate care needs of your elderly loved one.

*Comprehensive Post Hospitalization Care Package- \$1000.00*
